ABOUT

Data Engineer with 2+ years of experience at CloudPixels Consultancy Services building and maintaining data pipelines, designing data models, and optimizing cloud data warehouse solutions. Proficient in Snowflake, SQL, Python, ETL workflows, and data modeling with strong focus on data quality, performance optimization, and scalable architectures. Experienced in Snowpipe automation, dbt transformations, Airflow orchestration, and building repeatable data ingestion workflows. Skilled in schema design, data validation, performance tuning, and supporting downstream analytics teams with reliable, well-documented datasets.

TOOLS & SKILLS

Snowflake & Snowpipe
SQL & query optimization
Python & ETL development
Data modeling & schema design
dbt & Airflow
Cloud data warehousing
Data quality & validation
Performance tuning

WORK EXPERIENCE

CLOUDPIXELS CONSULTANCY SERVICES

- Data Engineer** · Jan 2024 – Mar 2026 (2 years 2 months)
Designed and maintained ETL pipelines, built Snowflake data models, optimized queries, and supported data warehouse operations for downstream analytics teams. Designed and implemented Snowflake schemas, views, and stored procedures for data warehousing. Built and maintained ETL pipelines using Python, SQL, and Airflow for data ingestion. Configured Snowpipe for automated data loading from S3 and cloud storage sources. Optimized SQL queries and Snowflake warehouses to reduce compute costs and improve performance. Developed dbt models for data transformations and maintained documentation for data lineage. Collaborated with analytics teams to validate data quality and resolve pipeline issues.
- Data Engineer Intern** · Jun 2023 – Dec 2023 (7 months)
Supported data pipeline development, schema design, and data validation tasks while learning cloud data warehousing and ETL best practices. Assisted with Snowflake schema design and table creation for data staging. Wrote SQL queries for data validation and quality checks across datasets. Supported ETL

pipeline testing and documented data flow processes. Helped configure Snowpipe auto-ingest rules for recurring data loads.

PROJECTS

Tamil Calendars 365 - Data Pipeline · Aug 2025 - Mar 2026

Built data ingestion and transformation pipelines to process platform usage data into Snowflake for analytics and reporting.

- Designed Snowflake schemas for daily usage, content engagement, and user activity data.
- Built ETL workflows using Python and SQL to ingest data from multiple sources.
- Configured Snowpipe for automated daily data loads from cloud storage.
- Optimized queries to reduce warehouse compute time and improve dashboard performance.

Christian Community Multimedia App - Data Warehouse · Mar 2024 - Oct 2025

Designed and maintained a Snowflake data warehouse to consolidate media consumption data for analytics and reporting.

- Built star schema data models for media engagement and user activity tracking.
- Developed dbt models for data transformations and materialized views.
- Implemented data quality checks and validation rules across pipelines.
- Created Airflow DAGs to orchestrate daily ETL workflows and error handling.

EDUCATION

Master of Computer Applications (MCA)

Jain University (Online)

Currently pursuing | Expected graduation: 2026

Bachelor of Science in Computer Science

Islamiah College (Autonomous)

CGPA: 7.89/10 | Graduated: 2022

CERTIFICATIONS

Snowflake SnowPro Core Certification - Snowflake (2025)

SQL (Intermediate) - HackerRank Skill Certification (2025)

Full Stack Development Certification - SmartCliff Learning Solutions (2023)
